Type of scientific work we are offering

Hydrological and sediment connectivity and geomorphological research in small to medium sized catchments (Austrian Alps, Bohemian Massif, Alpine Forelands); examples: effects of dams and their removal; effects of LWD (large woody debris); hydrological connectivity in proglacial environments; effects of different tree populations on sediment connectivity on steep river terraces; hillslope-channel connectivity in high-mountainous areas; effects of extensive land-cover changes on hillslope processes

Possible duration for an STSM

1-2 weeks

The best time to host an STSM in this institution

May - September
